| Rated power        | 60W                                 | Claimed output   | 2,000 lm                    |
| Battery            | 13,500 mAh                          | Runtime by level | 12 h / 20 h / 40 h          |
| Light modes        | White / Warm / Natural + SOS/red    | Charging         | USB-C, supports 2A charging |
| Ingress protection | IPX5-rated product design           | Product diameter | 16 cm                       |
| Packing data       | Confirm against the approved sample |                  |                             |

### Commercial and customization notes

MOQ, sample timing and production lead time are confirmed against the selected model, quantity, branding method, packaging and function changes. Available scope may include logo, colour, retail box, manual language, labels, accessories and selected functions.

Compliance document availability depends on the exact product, battery, charger and destination market. Request the applicable CE, FCC, RoHS, UN38.3, MSDS or charger file set before purchase.

DATA CONTROL NOTICE: Claimed values are based on the current supplied product specification. Final values and packing information must be confirmed in the approved sample, specification sheet, artwork and commercial agreement.
